Fax:

537 33-4327

The world has changed around us
and it wil continue to do
so at full speed.

The world has changed around us and it will continue to do so at full speed.

Leadership effectiveness is necessary either for short or long terms; it has to encourage cooperation for common well-being. Sooner than later, isolated vertical growing will be held back by the variety and multiplicity of actions of those who do not cooperate.

“Empowerment” is connected with self-development and with the creation of conditions for the development of people around us. It involves comprehension and implementation of new skills.

Emotional intelligence, changing of mental patterns and other terms can be different ways of referring to a better human interaction.

By the time our workshop is over, those who attended will be able to succeed in:

- Acknowledging some of his/her main potentialities
- Identifying and implementing skills to a better connection with people all around
- Increasing knowledge of communication and feedback

During these five days in which the workshop will take place, we will carry out several team works in order to share ideas in a non formal and pleasant way, as the beginning of an individual transformation experience, which could be later apply to your surroundings. Change will start from the moment you decide.

The workshop is aimed at:

- Managers and directors
- Entrepreneurs
- Consultants
- Community leaders
- Facilitator of human processes in organizations or communities.

Those who are interested in self-development and are willing to strengthen his/her skills in order to encourage forums where others could gain power and get more involved in the success of the organization.

The workshop is organized by Grupo Cambio Humano. A group with more than fifteen years of experience in consultancy, advising and training to enhance organizational effectiveness, leadership skills, human communication, creativity, team work, and learning.

We have been successful and learned from our mistakes. Those who have attended our courses have said that they have been impacted and have become better leaders. Improved communications within the organization, as well as in their personal lives, have been another benefit from our services.

Human values
also make a difference,
material resources
are not enough.
